

FOCUS SERVICE HOTELS CONCEPT GUIDELINES

1+9 Premium Orange Concentrate Nectar Juice No Plumbed In Dispenser Required

- Yorkshire Dispensers provided free on loan.
- Use the 2.5 litre Fill Line Jug (provided free on loan) to mix concentrates.
- Add water to the 2.5 litre marker near the top and you are good to go!
- 1 litre carton of 1+9 Premium Orange Concentrate Nectar Juice makes 10 litres end product reducing packaging versus Tetra Paks by 90%.
- For busier operations, create two separate juice station points to split the queue.

- Help offset the cost by introducing our premium hydration juice drink range for additional flavours
- For example, save up to 50% by switching the 100% Apple to our 1+19 Cloudy Apple and Cranberry to our 1+19 Redberry Juice Drink.
- Both are low in sugar (2%), have added vitamin C, as well as added Zinc and 20% fruit content!

“By cleverly re-thinking our juice offering, we’ve been able to increase our breakfast juice range & quality, improving the guest experience and without impacting on the overall juice cost.”

Bruce McDowell – Group Food and Beverage Director (De Vere)

BREAKFAST EQUIPMENT
