

PRIME HEALTHCARE

Supporting Patient Nutrition with Smart, Simple Solutions

For many patients, care home residents, and rehabilitation clients, maintaining adequate protein intake through solid foods alone can be a real challenge — especially during recovery or when appetite is low.

Ready-to-drink Frezz Protein+ enriched drinks provide a nutritious, tasty, and easily digestible solution that supports muscle maintenance, recovery, and overall health all in convenient, hygienic packaging ideal for healthcare environments.

Why Frezz Protein+ is the smart choice for healthcare providers:

High Protein Content

Each 150ml serving delivers more than 10g of high-quality protein, (Whey protein isolate -MILK) supporting muscle strength and healing.

Complete Amino Acid Profile

Contains all 9 essential amino acids from a full-fat protein source — ensuring better absorption and more effective nutrition.

Immune Support

Enhanced with vitamins C, D, and zinc in select products, these formulations are designed to enhance immunity and bolster resistance, particularly for vulnerable patients.

Convenient, Hygienic Packaging

Available in 0.2L and 1L Tetra Pak® cartons, ideal for self-service stations, beverage carts, or individual bedside use.

Long Shelf Life

Stays fresh for up to 6 months without refrigeration — perfect for hospital storage and inventory planning.
